

DHRUVA Connect Vega UTP Unloaded Patch Panel refers to the modular design with 24/48 empty ports in 1U, that enable to install Keystone Jacks. Same patch panel enables several types of cables to be connected both in straight and angled type, designed to accommodate Category 6, Category 6A Keystone Jacks. These panels are accompanied with smart cable manager to secure the distribution of horizontal cables

- Individually number ports.
- Integrated Smart Cable Manager offers a secured, Horizontal Cable distribution without any cable tie or Velcro
- Angled Patch Panel will eliminate the need for Horizontal Cable Manger, their by allowing for high density patching
- Mounts in standard 19-inch racks.
